Professional Summary

Software Engineer with almost 4 years of experience designing and operating production web applications across backend services, distributed systems, APIs, and frontend interfaces. Currently building critical logistics infrastructure for a fulfillment platform processing more than **12 million packages annually**, focusing on scalable architecture, performance optimization, and system reliability.

Strong backend expertise in Node.js and TypeScript, building high-performance APIs, optimizing PostgreSQL databases, and designing cloud-based solutions on AWS. Experienced collaborating closely with Product, Operations, DevOps, and Security teams to deliver reliable software at scale.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, SQL, Bash

Backend: Node.js, Ruby, Python, REST API design, WebSockets, authentication and RBAC, scalable backend architecture

Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS, component architecture, dashboards and internal tools

Databases: PostgreSQL, MySQL, MongoDB, schema design, indexing, migrations, query optimization, Redis caching

Cloud & Infrastructure: AWS (S3, EC2 collaboration with DevOps), PM2, CI/CD pipelines, Docker

Engineering Practices: Code review, API documentation, performance monitoring, clean code, cross-team collaboration

Professional Experience

Mid Software Engineer – Cubbo

Apr 2026 – Present

Mexico City (Hybrid)

- Develop backend services for a fulfillment platform processing more than **12 million packages annually** across Latin America.
- Design and implement high-performance APIs and critical integrations with marketplaces, carriers, and internal services, prioritizing scalability and reliability.
- Optimized a critical processing workflow, reducing latency by **2–3 seconds per package**, eliminating more than **24 million seconds (6,600+ hours)** of cumulative processing time annually.
- Contribute to architecture decisions, production incident resolution, and code reviews to ensure high availability and long-term maintainability.
- Partner closely with Product, Operations, and Infrastructure teams while leveraging AI-assisted development tools such as Claude, Gemini, and GitHub Copilot to accelerate delivery without compromising code quality.

Full Stack Engineer – Xira

Nov 2023 – Nov 2025

Remote

- Developed enterprise web applications for clients across banking, insurance, healthcare, telecommunications, and retail.
- Progressed from maintaining legacy systems to owning end-to-end products, driving architecture decisions across the full stack.
- Led the development of an AI-powered call simulation platform using Node.js, WebSockets, and React.
- Designed REST APIs, JWT-based authentication, and scalable relational data models for enterprise applications.
- Improved backend performance through query optimization, indexing, pagination, and caching strategies, reducing critical response times from **5–7 seconds** to approximately **1.2 seconds**.
- Collaborated closely with Product Managers, QA, DevOps, and Security teams throughout the software development lifecycle.

Developed Products

OaxaTech — E-commerce Platform

Aug 2023

Full Stack Developer

- Built an SEO-optimized e-commerce platform using React and Node.js with integrated Stripe payments.

- Developed modular frontend components and backend REST APIs supporting product catalog, checkout flows, and payment processing.
- Implemented SEO improvements including metadata, URL structures, and content optimization, achieving first-page search visibility for targeted queries.

Real Space — Real Estate Sales Platform
Full Stack Developer

Sept 2022

- Designed and implemented a real estate sales platform focused on improving lead conversion and quotation workflows.
- Built backend services using Node.js REST APIs with authentication and role-based access control.
- Automated quotation generation and PDF exports, reducing manual operational work for sales teams.

Education & Activities

Danone Hackathon Mexico – Frontend Challenge Participant
Renewable Energy Engineering – Benemerita Universidad Autonoma de Puebla

Jun 2023
Aug 2019 - Jul 2022
